Contents of Vol. 141

Part 1

Editorial 1

J. R. Fryer and David J. Smith. High resolution electron microscopy of interfaces in chlorinated phthalocyanine molecular crystals 3

E. F. J. van Bruggen, J. F. L. van Breemen, W. Keegstra, E. J. Boekema and M. G. van Heel. Two-dimensional crystallization experiments 11

José María Carazo, Antonio Santisteban and José L. Carrascosa. Study of the direct Fourier method for the three-dimensional reconstruction of objects in the case of a missing angular data range 21

R. S. Balaban, I. Kurtz, H. E. Cascio and P. D. Smith. Microscopic spectral imaging using a video camera 31

C. H. Wouters, H. K. Koerten, J. Bonnet, W. Th. Daems and J. S. Ploem. Quantitative DNA measurements in an instrument combining scanning electron microscopy and light microscopy 41

N. Falser, I. Bandtlow, M. Haus and H. Wolf. Demonstration of pseudorabies virus DNA in the mouse inner ear by an *in situ* nucleic acid hybridization technique in plastic embedded bony material 55

Gregory R. Hook, Ronald J. Elin, Jeanette M. Hosseini, Carol Swyt and Charles E. Fiori. A sample preparation for quantitative determination of magnesium in individual lymphocytes by electron probe X-ray microanalysis 69

Thomas von Zglinicki, Martina Rimmler and Hans-Joachim Purz. Fast cryofixation technique for X-ray microanalysis 79

Erik Hasselager. Surface exchange area of the porcine placenta: morphometry of anisotropic interdigitating microvilli 91

Thomas Gahm and Siegfried Witte. Measurement of the optical thickness of transparent tissue layers 101

J. Coetzee and C. F. van der Merwe. The osmotic effect of glutaraldehyde-based fixatives on plant storage tissue 111

Sinikka Eskelinen and Terence Coakley. Microscopic observation and video recording of cellular response to sudden changes in environment 119

Book Review; Errata 127

Rapid Publication

M. Radermacher, T. Wagenknecht, A. Verschoor and J. Frank. A new 3-D reconstruction scheme applied to the 50S ribosomal subunit of *E. coli* RP1

Part 2

J. Heydenreich and O. Breitenstein. Characterization of defects in semiconductors by combined application of SEM(EBIC) and SDLTS 129

W. Bergholz, J. L. Hutchinson and P. Pirouz. Enhanced oxygen diffusion and precipitation in silicon 143
A. Cerezo, C. R. M. Grovenor and G. D. W. Smith. Pulsed laser atom probe analysis of semiconductor materials 155
Hatsuko Fukudome and Keiichi Tanaka. A method for observing intracellular structures of free cells by scanning electron microscopy 171
R. Rachel, U. Jakubowski and W. Baumeister. Electron microscopy of unstained, freeze-dried macromolecular assemblies 179
Sabine Palle, Daniel Chappard, Christian Alexandre and Jean-Baptiste Orsini. Friable rock embedding in methyl methacrylate for thin-sectioning in geological preparations 193
G. J. te Meerman, G. J. P. A. Anders and J. Wierda. Raster images and measurement with a Vickers M86 scanning microdensitometer and interferometer by computer control 199
D. J. Goldstein, R. Lovering and I. J. Hartmann-Goldstein. Computer-aided microdensitometry and specimen imaging with the Vickers M85A 213
Mircea Fotino. Electronic image formation in high-voltage TEM by sequential pixel acquisition 223

Rapid Publication
I. S. Harper. Glutaraldehyde-induced permeabilization of cell membranes RP3

Part 3

Low Temperature Biological Microscopy and Analysis

Felix Franks Metastable water at subzero temperatures 243
C. A. Angell and Y. Choi. Crystallization and vitrification in aqueous systems 251
Ch. Körber, S. Englich, P. Schwindke, M. W. Scheiwe, G. Rau, A. Hubel and E. G. Gravalho. Low temperature light microscopy and its application to study freezing in aqueous solutions and biological cell suspensions 263
Richard D. Fetter and M. Joseph Costello. A procedure for obtaining complementary replicas of ultra-rapidly frozen sandwiched samples 277
W. T. M. Gruijters and S. Bullivant. Freeze-fracturing at defined temperatures provides information on temperature rise during fracture, and on membrane complementarity 291
W. F. Voorhout, J. J. M. Leunissen-Bijvelt, J. L. M. Leunissen and A. J. Verkleij. Steric hindrance in immunolabelling 303
H. K. Hagler and L. M. Buja. Effect of specimen preparation and section transfer techniques on the preservation of ultrastructure, lipids and elements in cryosections 311
T. A. Hall. Properties of frozen sections relevant to quantitative microanalysis 319
Patrick Echlin and S. Edith Taylor. The preparation and X-ray microanalysis of bulk frozen hydrated vacuolate plant tissue 329
J. Trinick, J. Cooper, J. Seymour and E. H. Egelman. Cryo-electron microscopy and three-dimensional reconstruction of actin filaments 349
Eva-Maria Mandelkow, Roberto Rapp and Eckhard Mandelkow. Microtubule structure studied by quick freezing: cryo-electron microscopy and freeze fracture 361
Yeshayahu Talmón, Marc Adrian and Jacques Dubochet. Electron beam radiation damage to organic inclusions in vitreous, cubic, and hexagonal ice 375
International Experimental Study Group. Cryoprotection in electron microscopy 385
